

RAITH GMBH - A 35-year success story made in Dortmund!

Nanotechnology company Raith GmbH is a figurehead for Dortmund's progress into an innovative location for technological development. Founded in 1980 in the Technology Park, Raith has remained faithful to its home even after relocating due to expansion and is still headquartered in Dortmund today, in the middle of Phoenix-West.

On October 30, the management of Dortmund-based Raith GmbH invited their employees, their sales and business partners and friends to the festive RAITH Anniversary Gala in the Gold Hall of Dortmund's Westfalenhallen to express their warm thanks. Around 300 guests accepted the invitation to celebrate the happy occasion. German TV presenter Peter Grossmann (from the major ARD channel) acted as MC through the evening. At the start of the event, he and RAITH CEO Dr. Ralf Jede welcomed the two official representatives of the regional economic organizations: Wulf-Christian Ehrich, deputy general manager and head of the international division of Dortmund Chamber of Commerce and Industry, and Thomas Westphal, managing director of the Economic Development Agency.

A pleasant surprise and a highlight for many attendees was the presence of the founder of the company, Dr. Hermann Raith. A true pioneer in the industry who showed great foresight concerning future developments, Dr. Raith did not want to miss the occasion of the "RAITH Anniversary Gala" to visit Dortmund. A moving moment for him, and certainly for many of those present.

The gala evening was a huge success, with a colorful show program, delicious food and a lot of happy faces – all focused with optimism and confidence towards the future with Raith GmbH.
